STEEL AUTHORITY OF INDIA LIMITED

### MESSAGE

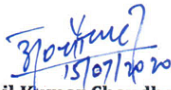

Steel Authority of India Limited (SAIL) is amongst the oldest steel producing company in India. Having been set up more than six decades back, the Company continues to fulfil the steel requirement of the Country's ever growing infrastructural activities in the Country. The progress made by the Maharatna Giant can be gauged from the fact that it continues to be amongst India's largest steel producing companies having diversified its portfolio to cater to the needs of almost all segments.

The consistency and growth of the Company are attributable great to the Centre for Engineering and Technology (CET), headquartered at Ranchi and presently having strength of 200 dedicated employees. CET has gradually and consistently evolved over the years and is today capable of catering to the entire consultancy need in the projects related areas. Today, CET is handling projects of nearly Rs. 45,000 crore including appointment of MDO at Tasra coking coal mines, MDO at Taldih, installation of Coke Oven Batteries, SMS-I, Caster, LF at BSL, New Hot Strip Mill at RSP, Installation of New Bar Mill, Converter Shell changing at DSP & BSP, RH plant at BSL, BSP, Oxygen Plant at RSP, BSL, Power evacuation project at DSP, RSP etc..

While the achievements of CET commendable, it is equally important to focus on the tasks and challenges ahead. SAIL has set its vision on becoming a 50 MTPA Company by the turn of next decade. CET as an in-house consultant has a major role to play in materializing this vision. For this, CET has to further strengthen its competence in areas beyond mere designing the project layouts and drafting the tender specifications. CET should be able to guide the Plants on the technologies that should be adopted by them for increasing operational efficiencies and reducing costs. It should lay special emphasis on projects in logistics, mineral beneficiation, iron ore pelletisation, material handling, power plant, slag granulation plant, blast furnace stoves, recycling of waste water for zero liquid discharge, automation and related areas. In the project appraisal area, CET should work on improving the competence towards financial appraisal apart from technical aspects. Other important aspect that CET has to ensure is completion of projects in time by partnering with the plants at every stage of planning and execution. CET should also aim to contribute in the area of augmenting SAIL's income as well by rendering consultancy services to the outside steel plants.

While congratulating CET, its employees & their family members a very happy Foundation Day, I would take this opportunity to convey my best wishes for the times to come. The clarion call of the Hon'ble Prime Minister for 'Make in India' and 'Vocal for Local' presents before CET a huge opportunity, along with obvious challenges, which I am sure CET Collective would leverage fully, equipped with very capable, experienced, positive and vibrant workforce, making themselves, the Company and the Country proud. I urge all CET employees to take a pledge and work in the directions pointed out by me.

Congratulations once again.

  
(Anil Kumar Chaudhary)

### MESSAGE

My heartiest felicitations to CET collective on the momentous occasion of Foundation Day. It's indeed a great pleasure to be a part of CET and I am really happy to see the progress that has so far been achieved. And, for all these, the credit goes to all our dedicated members who have selflessly contributed a lot in making this organisation reach where it is today, while sincerely acknowledging the contributions of all the ex-employees- who laid the foundation of this strong and vibrant organisation.

We have achieved a lot and still we have to go a long way and I believe, we can achieve our common goal by working together.

Congratulations once again!

Keep helping and keep growing.

## Message

It is heartening to note that SAIL-CET will be completing 38 years of its glorious existence on July 15, 2020. I congratulate the CET fraternity on their Foundation Day. During its nearly four decades of existence, CET has contributed immensely as an in-house design, engineering and consultancy wing of SAIL. From a modest beginning, it has indeed come a long way as a consultant for SAIL Projects.

Yet many new horizons remain unexplored for CET to develop its capabilities in the coming years, one of them being the commercial aspects of a consultant. At the same time, CET needs to remain professional in its approach and constantly strive for excellence in all its spheres of activity.

Once again, my heartiest congratulations to all on this Special Day and wishing the CET collective many more years of unparalleled success.

## MESSAGE

Centre for Engineering & Technology, SAIL's in-house consultancy, is a pool of brilliant minds. With you at CET, providing consultancy, our dependence on other consultants have reduced significantly.

As a centre of knowledge, your quest for knowledge should continue to grow and you may adopt new technology, find new solutions and be updated with latest technical developments so that you can provide holistic solutions and make a meaningful difference to company's bottomline.

I am sure you would continue to grow in the coming years.

Wising ED, CET and the team a happy CET Foundation day.

## MESSAGE

At the very outset I would like to express my heartiest congratulations and best wishes to SAIL, CET for completing 38 years on 15<sup>th</sup> July.

CET has made a name for itself as a frontline Consultant in the dynamic field of engineering and technology. Over the years, RSP and CET have enjoyed a symbiotic relationship steering together several prestigious projects.

I am confident in the days to come Team CET will explore new vistas and set fresh benchmarks in the field of consultancy.

On this momentous occasion I wish CET a vibrant, enriching and fulfilling future.

MESSAGE

Our heartiest congratulations as CET celebrates its 38<sup>th</sup> Foundation Day on 15th July 2020. You are not just our consultants; you are the assets that we value most. The growth of your technical expertise, especially in new areas, continuously has been a great beacon and of immense help in taking SAIL forward.

Thanks for being a part of us in formulating the projects and being always in readiness to provide solutions.
