# Salient Features & Performance Highlights

## Indian Steel Industry Performance in April-July 2021: Salient Features

- Provisional data released by JPC for April-July 2021 indicates that domestic finished steel production stood at 35.264 mt (up by 59.1%) and domestic consumption was at 33.026 mt (up by 65.8%). India was a net exporter of total finished steel with exports (5.069 mt, up by 9.2%) outpacing imports (1.568 mt, up by 4.1%) during this period.
- Domestic crude steel production stood at 37.848 mt and was up by 45.8% over same period of last year. Overall PSU production reported a growth of 59.0% whereas the Private Sector players also reported a growth of 43.1%.
- Volume wise, non-alloy GP/GC Sheets/Coils (0.285 mt, up by 29.7%) was the item most imported (27% share in total non-alloy). Also, Korea (0.659 mt) was the largest import market for India. Volume wise, non-alloy HR Coil/Strip (2.272 mt, down by 31.0%) was the item most exported (48% share in total non-alloy). Italy (0.730 mt) was the largest export market.
- Import of total finished steel was valued at Rs 13,241 crores (USD 1,791 million) whereas export of total finished steel was valued at Rs 36,113 crores (USD 4885 million). Thus, overall trade surplus (total finished steel) stood at Rs 22,872 crores during April-July 2021 (prov).
- Within only a span of six months into 2021, world crude steel production has crossed the 1 billion tonne mark and stood at 1003.93 million tonnes (mt) in January - June 2021, up by a robust 14.4% over same period of last year as per provisional data released by World Steel Association (worldsteel). Even though the high growth rate may be attributed partly to low base effect but the volume growth indicates that the impact of COVID-19 has seen slow waning out as countries around the world have resurrected themselves, operating under the New Normal conditions.
- China remained the leader in world crude steel production which stood at 563.33 mt during January-June 2021, up nearly 12% over same period of last year. The nation accounted for 77% of Asian and 56% of world crude steel production during this period. With a 6% share in total world production, India (57.93 mt) reported a production growth of 31.3% during this period and remained the 2nd largest producer during this period.
- After reaching record-breaking highs at the end of 2020, global steel prices continued to show signs of a return to “normalcy” with most markets reporting either a softening or a stability at a reduced level. Nonetheless, they remained on strong grounds at the end of the start of the 2nd half of the year, impacted by rising demand, stringent supply and a volatile raw material (read iron ore, scrap) market.
- The domestic economic environment remained moderate. This was reflected in the official statistics with growth in GDP during 2020-21 declining by 7.3% in 2020-21 as per provisional reports, compared to a growth of 4% in 2019-20. Almost all the lead sectors reported a decline in 2020-21 except Agriculture and allied sectors and Electricity, Gas, Water and Other Utility Services. Impacted by a significantly low base, April-June 2021 reported a 45% rise in IIP and 25% rise in Eight Infrastructure Index over same period of last year.

## INDIAN STEEL MARKET: PERFORMANCE HIGHLIGHTS

The following is a status report on the performance of Indian steel industry during April-July 2021, based on provisional data released by Joint Plant Committee (JPC) in its MIS Report for April-July 2021. It is to be noted that total finished steel includes both non-alloy and alloy (including stainless steel) and all comparisons are made with regard to same period of last year.
