Salient Features & Performance Highlights

JOINT PLANT COMMITTEE

Indian Steel Industry Performance in April-August 2021: Salient Features

- Provisional data released by JPC for April-August 2021 indicates that domestic finished steel production stood at 44.237 mt (up by 44.0%) and domestic consumption was at 40.885 mt (up by 45.6%). India was a net exporter of total finished steel with exports (6.400 mt, up by 12.7%) outpacing imports (1.963 mt, up by 17.8%) during this period.
- Domestic crude steel production stood at 47.612 mt and was up by 35.8% over same period of last year. Overall PSU production reported a growth of 49.0% whereas the Private Sector players also reported a growth of 33.0%.
- Volume wise, non-alloy GP/GC Sheets/Coils (0.333 mt, up by 34.9%) was the item most imported (27% share in total non-alloy). Also, Korea (0.844 mt) was the largest import market for India. Volume wise, non-alloy HR Coil/Strip (2.88 mt, down by 27.6%) was the item most exported (48% share in total non-alloy). Italy (0.870 mt) was the largest export market.
- Import of total finished steel was valued at Rs 17,142 crores (USD 2,316 million) whereas export of total finished steel was valued at Rs 46,304 crores (USD 6,257 million). Thus, overall trade surplus (total finished steel) stood at Rs 29,162 crores during April-August 2021 (prov).
- Having already crossed the 1 billion tonne mark, world crude steel production continued to create new records and stood at 1165.34 million tonnes (mt) in January – July 2021, up by a robust 12.4% over same period of last year as per provisional data released by World Steel Association (worldsteel). Even though the high growth rate may be attributed partly to low base effect but the volume growth indicates that the impact of COVID-19 has seen slow waning out as countries around the world have resurrected themselves, operating under the New Normal conditions.
- China remained the leader in world crude steel production which stood at 649.33 mt during January-July 2021, up 8% over same period of last year. The nation accounted for 76% of Asian and 56% of world crude steel production during this period. With a 6% share in total world production, India (67.98 mt) reported a yoy production growth of 29% during this period and remained the 2nd largest producer during this period.
- After reaching record-breaking highs at the end of 2020, global steel prices continued to show signs of a return to “normalcy” with most markets reporting either a softening or a stability at a reduced level. Nonetheless, they remained on strong grounds during the 3rd quarter of the year, impacted by rising demand, stringent supply and a volatile raw material (read iron ore, scrap) market. Of potential concern was the drop in iron ore prices, impacted by announced production curbs in China, which, if sustained, may go on to impact steel prices gradually.
- The domestic economic environment remained upbeat, though the official statistics continued to be impacted by low base effect. This was reflected in the 20% growth in GDP during Q1 2021-22 (prov.), a 34% rise in IIP and 21% rise in Eight Infrastructure Index, the latter two for April-July 2021 (prov) period.
