Salient Features & Performance Highlights

JOINT PLANT COMMITTEE

Indian Steel Industry Performance in April-September 2021: Salient Features

- Provisional data released by JPC for April-September 2021 indicates that domestic finished steel production stood at 53.341 mt (up by 35.9%) and domestic consumption was at 49.114 mt (up by 34.4%). India was a net exporter of total finished steel with exports (7.754 mt, up by 18.5%) outpacing imports (2.373 mt, up by 19.6%) during this period.
- Domestic crude steel production stood at 57.159 mt and was up by 30.0% over same period of last year. Overall PSU production reported a growth of 42.6% whereas the Private Sector players also reported a growth of 27.4%.
- Volume wise, non-alloy GP/GC Sheets/Coils (0.391 mt, up by 29.3%) was the item most imported (27% share in total non-alloy). Also, Korea (1.015 mt) was the largest import market for India. Volume wise, non-alloy HR Coil/Strip (3.434 mt, down by 23.5%) was the item most exported (48% share in total non-alloy). Vietnam (0.992 mt) was the largest export market.
- Import of total finished steel was valued at Rs 21,227 crores (USD 2,872 million) whereas export of total finished steel was valued at Rs 56,041 crores (USD 7,582 million). Thus, overall trade surplus (total finished steel) stood at Rs 34,814 crores during April-September 2021 (prov).
- Having already crossed the 1 billion tonne mark earlier, world crude steel production stood at 1322 million tonnes (mt) in January – August 2021, up by 10.6% yoy as per provisional data released by World Steel Association (worldsteel). While the volume growth at a cumulative level indicated the diminishing impact of COVID-19, yet at a monthly level, world production declined 2.6% in August 2021 over July 2021, pulled down by the stringent production curbs in China, where production dipped 13% in August 2021 over July 2021. On a year-on-year (yoy) basis too, production dipped 1.4% in August 2021.
- China remained the leader in world crude steel production which stood at 733.02 mt during January-August 2021, up 5.3% over same period of last year. The nation accounted for 76% of Asian and 56% of world crude steel production during this period. With a 6% share in total world production, India (77.74 mt) reported a yoy production growth of 26% during this period and remained the 2nd largest producer during this period.
- After reaching record-breaking highs at the end of 2020, global steel prices continued to show signs of a return to “normalcy” with most markets reporting either a softening or a stability at a reduced level. Nonetheless, they remained on strong grounds during the 3rd quarter of the year, impacted by rising demand, stringent supply and a volatile raw material (read iron ore, scrap) market. Of potential concern was the drop in iron ore prices, impacted by announced production curbs in China, which, if sustained, may go on to impact steel prices gradually.
- The domestic economic environment remained upbeat, though the official statistics continued to be impacted by low base effect. This was reflected in the 20% growth in GDP during Q1 2021-22 (prov.), a 29% rise in IIP and 19% rise in Eight Infrastructure Index, the latter two for April-August 2021 (prov) period.
