Salient Features & Performance Highlights

JOINT PLANT COMMITTEE

Indian Steel Industry Performance in April-October 2021: Salient Features

- Provisional data released by JPC for April-October 2021 indicates that domestic finished steel production stood at 62.877 mt (up by 29.9%) and domestic consumption was at 57.899 mt (up by 26.1%). India was a net exporter of total finished steel with exports (8.809 mt, up by 24.1%) outpacing imports (2.751 mt, up by 17.2%) during this period.
- Domestic crude steel production stood at 66.805 mt and was up by 24.8% over same period of last year. Overall PSU production reported a growth of 35.1% whereas the Private Sector players also reported a growth of 22.6%.
- Volume wise, non-alloy GP/GC Sheets/Coils (0.455 mt, up by 23.0%) was the item most imported (27% share in total non-alloy). Also, Korea (1.176 mt) was the largest import market for India. Volume wise, non-alloy HR Coil/Strip (3.972 mt, down by 16.9%) was the item most exported (49% share in total non-alloy). Vietnam (1.157 mt) was the largest export market.
- Import of total finished steel was valued at Rs 25,175 crores (USD 3,400 million) whereas export of total finished steel was valued at Rs 63,998 crores (USD 8,644 million). Thus, overall trade surplus (total finished steel) stood at Rs 38,823 crores during April-October 2021 (prov).
- Having already crossed the 1 billion tonne mark, world crude steel production stood at 1461 million tonnes (mt) in January – September 2021, up by 7.8% over same period of last year as per provisional data released by World Steel Association (worldsteel). While the volume growth at a cumulative level indicated the diminishing impact of COVID-19, yet at a monthly level, world production declined 6.5% in September 2021 over August 2021, pulled down by the stringent production curbs in China, where production dipped 21% in September 2021 over August 2021. On a year-on-year (yoy) basis too, global production dipped 9% in September 2021.
- China remained the leader in world crude steel production which stood at 805.89 mt during January-September 2021, up 2% over same period of last year. The nation accounted for 76% of Asian and 55% of world crude steel production during this period. With a 6% share in total world production, India (87.29 mt) reported a yoy production growth of 23.3% during this period and remained the 2nd largest producer during this period.
- Global steel prices remained on strong grounds during the 3rd quarter of the year, impacted by rising demand, stringent supply and a volatile raw material (read iron ore, scrap) market. Of potential concern are the steel market developments in China, where production cuts – both on-going and upcoming – are expected to impact global demand-supply to a significant level in the coming days. If that materialises, then it would be only a matter of time before global trade flows and global steel price trends, stand to be affected to a similar degree.
- The domestic economic environment remained upbeat, though the official statistics continued to be impacted by low base effect. This was reflected in the 20% growth in GDP during Q1 2021-22 (prov.), a 23% rise in IIP and 16% rise in Eight Infrastructure Index, the latter two for April-September 2021 (prov) period.
