Salient Features & Performance Highlights

JOINT PLANT COMMITTEE

Indian Steel Industry Performance in April-November 2021: Salient Features

- Provisional data released by JPC for April-November 2021 indicates that domestic finished steel production stood at 72.819 mt (up by 26.8%) and domestic consumption was at 67.124 mt (up by 21.7%). India was a net exporter of total finished steel with exports (9.531 mt, up by 23.8%) outpacing imports (3.063 mt, up by 13.5%) during this period.
- Domestic crude steel production stood at 77.181 mt and was up by 22.3% over same period of last year. Overall PSU production reported a growth of 29.8% whereas the Private Sector players also reported a growth of 20.6%.
- Volume wise, non-alloy GP/GC Sheets/Coils (0.499 mt, up by 12.6%) was the item most imported (26% share in total non-alloy). Also, Korea (1.295 mt) was the largest import market for India. Volume wise, non-alloy HR Coil/Strip (4.289 mt, down by 16.5%) was the item most exported (49% share in total non-alloy). Vietnam (1.285 mt) was the largest export market.
- Import of total finished steel was valued at Rs 28,579 crores (USD 3,857 million) whereas export of total finished steel was valued at Rs 69,720 crores (USD 9410 million). Thus, overall trade surplus (total finished steel) stood at Rs 41,141 crores during April-November 2021 (prov).
- Having already crossed the 1 billion tonne mark, world crude steel production stood at 1607.13 million tonnes (mt) in January - October 2021, up by 5.9% over same period of last year as per provisional data released by World Steel Association (worldsteel). While the volume growth at a cumulative level indicated the diminishing impact of COVID-19, yet at a monthly level, world production grew marginally (by 0.4%) in October 2021 over September 2021, pulled down by stringent production curbs in China, where production dipped 3% in October 2021 over September 2021. On a year-on-year (yoy) basis, global production dipped by 10.6% in October 2021, dragged down by a 23% decline in Chinese production in same period.
- China remained the leader in world crude steel production which stood at 877.05 mt during January-October 2021, down 0.7% over same period of last year. The nation accounted for 76% of Asian and 55% of world crude steel production during this period. With a 6% share in total world production, India (96.93 mt) reported a yoy production growth of 20.6% during this period and remained the 2nd largest producer during this period.
- After reaching record-breaking highs at the end of 2020, global steel prices continued to show moderation and signs of a return to “normalcy” with most markets reporting either a softening or a stability at a reduced level. The trend continued in November 2021 as well. Nonetheless, as seen before also, they remained on strong grounds during the 3rd quarter of the year, impacted by rising demand, stringent supply and a volatile raw material (read iron ore, scrap) market. Of potential concern are the steel market developments in China, where production cuts – both on-going and upcoming – are already evident and further curbs are expected to impact global demand-supply to a significant level in the coming days. If that materialises, then it would be only a matter of time before global trade flows and global steel price trends, stand to be affected to a similar degree.
- The domestic economic environment remained upbeat, though the official statistics continued to be impacted by low base effect. This was reflected in the 14% growth in GDP during H1 2021-22 (prov.), a 20% rise in IIP and 15% rise in Eight Infrastructure Index, the latter two for April-October 2021 (prov) period.
