Salient Features & Performance Highlights

JOINT PLANT COMMITTEE

Indian Steel Industry Performance in April- September 2022: Salient Features

- Provisional data released by JPC for April-September 2022 indicates that domestic finished steel production stood at 58.05 mt (up by 7.6%) and domestic consumption was at 55.431 mt (up by 11.5%). India was a net exporter of total finished steel with exports (3.601 mt, down by 53.6%) outpacing imports (2.558 mt, up by 7.8%) during this period.
- Domestic crude steel production stood at 61.056 mt and was up by 6.1% over same period of last year. Overall PSU production reported a decline of 5.1% whereas the Private Sector players reported a growth of 8.8%.
- Volume wise, CR Coil/Sheets (0.798 mt) was the item most imported (31% share in total finished steel). Also, Korea (1.092 mt) was the largest import market for India. Volume wise, HR Coil/Strip (1.860 mt) was the item most exported (52% share in total finished steel). Italy (0.504 mt) was the largest export market for India.
- Import of total finished steel was valued at Rs 29,793 crores (USD 3,793 million) whereas export of total finished steel was valued at Rs 31,049 crores (USD 3,953 million). Thus, overall trade surplus (total finished steel) stood at Rs 1,256 crores during April-September 2022 (prov).
- World crude steel production stood at 1,253.9 mt in January-August 2022, registering a decline of 5.1% year-on-year (yoy), according to provisional data released by World Steel Association (worldsteel). China remained the leader in world crude steel production with an output of 693.2 mt in January-August 2022, a decline of 5.7% yoy. The country accounted for 55.3% of world crude steel production during the period. India was the 2nd largest producer of crude steel with an output of 83.5 mt in January-August 2022, showing a yoy growth of 7.1%. The country accounted for 6.7% of world crude steel production during the first eight months of calendar year 2022. Further, India and Iran were the only two countries among the top 10 steel producing countries in the world which registered growth in production during January-August 2022.
- Global steel prices continued to remain under pressure from many sides in September 2022 including the Russia-Ukraine conflict and its many-sided repercussions, from raw material supply to logistics to uncertainties in trade flows to the growing impact of sanctions, the fresh emergence of COVID-19 cases in China coupled with concerns over its sinking property market to fluctuations in prices of major raw materials for steel making which remained south bound at end of Q3 2022. Prices also came under pressure from rising energy costs in Europe where demand conditions in any case remain weak to modest and recessionary traits in the US and fear of the same sparking off a global recession. Global steel prices thus remained south-bound during the 2ndhalf of 2022 so far, with most participants adopting a wait-and-watch outlook – for price-slide to bottom out and market to stabilise before they return for significant volume of transactions.
- The domestic economic environment remained upbeat. This was reflected in the 13.5% growth in GDP during Q1 2022-23 (estimated), a 7.7% rise in IIP and a 9.8% rise in Eight Infrastructure Index both during April-August 2022 (prov.) period.
