Salient Features & Performance Highlights

JOINT PLANT COMMITTEE

Indian Steel Industry Performance in April- October 2022: Salient Features

- Provisional data released by JPC for April-October 2022 indicates that domestic finished steel production stood at 68.172 mt (up by 6.9%) and domestic consumption was at 65.680 mt (up by 11.7%). India was a net exporter of total finished steel with exports (3.961 mt, down by 55%) outpacing imports (3.151 mt, up by 14.5%) during this period.
- Domestic crude steel production stood at 71.564 mt and was up by 5.7% over same period of last year. Overall PSU production reported a decline of 4.7% whereas the Private Sector players reported a growth of 8.1%.
- Volume wise, HR Coil/Strip (1.015 mt) was the item most imported (32% share in total finished steel). Also, Korea (1.293 mt) was the largest import market for India. Volume wise, HR Coil/Strip (2.097 mt) was the item most exported (53% share in total finished steel). Vietnam (0.563 mt) was the largest export market for India.
- Import of total finished steel was valued at Rs 35,711 crores (USD 4,518 million) whereas export of total finished steel was valued at Rs 33,937 crores (USD 4,294 million). Thus, overall trade surplus (total finished steel) stood at Rs 1,775 crores during April-October 2022 (prov).
- World crude steel production stood at 1405.2 mt in January-September 2022, registering a decline of 4.3% year-on-year (yoy), according to provisional data released by World Steel Association (worldsteel). China remained the leader in world crude steel production with an output of 780.8 mt in January-September 2022, a decline of 3.4% yoy. The country accounted for 56% of world crude steel production during this period. India was the 2nd largest producer of crude steel with an output of 93.3 mt in January-September 2022, showing a yoy growth of 6.4%. The country accounted for 6.6% of world crude steel production during this period. Further, India and Iran were the only two countries among the top 10 steel producing countries in the world which registered growth in production during January-September 2022.
- Global steel prices continued to remain under pressure from many sides in October 2022, be it the Russia-Ukraine conflict and its many-sided repercussions, developments in the Chinese market : fresh emergence of COVID-19 cases, its sinking property market where news of latest updates have depressed sentiments, rising energy costs in Europe where demand conditions in any case remain weak to modest among others. Steel prices thus remained largely south-bound during Q3 2022 with rises if any, noted with caution and with most participants adopting a wait-and-watch outlook – for markets to stabilise before they return for significant volume of transactions.
- The domestic economic environment remained upbeat. This was reflected in the 13.5% growth in GDP during Q1 2022-23 (estimated), a 7% rise in IIP and a 9.6% rise in Eight Infrastructure Index both during April-September 2022 (prov.) period.
