## Indian Steel Industry Performance in April- November 2022: Salient Features

- Provisional data released by JPC for April-November 2022 indicates that domestic finished steel production stood at 78.090 mt (up by 6.9%) and domestic consumption was at 75.340 mt (up by 11.9%). India was a net exporter of total finished steel with exports (4.299 mt, down by 54.9%) outpacing imports (3.751 mt, up by 22.5%) during this period.
- Domestic crude steel production stood at 81.962 mt and was up by 5.6% over same period of last year. Overall PSU production reported a decline of 3.9% whereas the Private Sector players reported a growth of 7.9%.
- Volume wise, HR Coil/Strip (1.22 mt) was the item most imported (33% share in total finished steel). Also, Korea (1.495 mt) was the largest import market for India. Volume wise, HR Coil/Strip (2.277 mt) was the item most exported (53% share in total finished steel). Vietnam (0.623 mt) was the largest export market for India.
- Import of total finished steel was valued at Rs 42,385 crores (USD 5,338 million) whereas export of total finished steel was valued at Rs 36,801 crores (USD 4,635 million). Thus, overall trade deficit (total finished steel) stood at Rs 5,584 crores during April-November 2022 (prov).
- World crude steel production stood at 1,552.7 mt in January-October 2022, registering a decline of 3.9% year-on-year (yoy), according to provisional data released by World Steel Association (worldsteel). China remained the leader in world crude steel production with an output of 860.6 mt in January-October 2022, a decline of 2.2% yoy. The country accounted for 55.4% of world crude steel production during the January-October 2022 period. India was the 2<sup>nd</sup> largest producer of crude steel with an output of 103.8 mt in January-October 2022, showing a yoy growth of 6.1%. The country accounted for 6.7% of world crude steel production during the first 10 months of calendar year 2022. Further, India and Iran were the only two countries among the top 10 steel producing countries in the world which registered growth in production during January-October 2022.
- Global steel prices continued to remain under pressure from many sides in November 2022, be it the Russia-Ukraine conflict and its many-sided repercussions, developments in the Chinese market: fresh emergence of COVID-19 cases, its sinking property market where news of latest updates have depressed sentiments, rising energy costs in Europe where demand conditions in any case remain weak to modest among others. Steel prices thus remained largely south-bound during Q3 2022 with rises if any, noted with caution and with most participants adopting a wait-and-watch outlook – for markets to stabilise before they return for significant volume of transactions.
- The domestic economic environment remained upbeat. This was reflected in the 13.5% growth in GDP during Q1 2022-23 (estimated), a 5.3% rise in IIP and a 9.6% rise in Eight Infrastructure Index both during April-October 2022 (prov.) period.

## INDIAN STEEL MARKET: PERFORMANCE HIGHLIGHTS
